

GREENCORE ENTERPRISES LIMITED

COMPANY PROFILE

At the CORE of Metals.....

Green Core

Zambia: MINING

Key Advantages

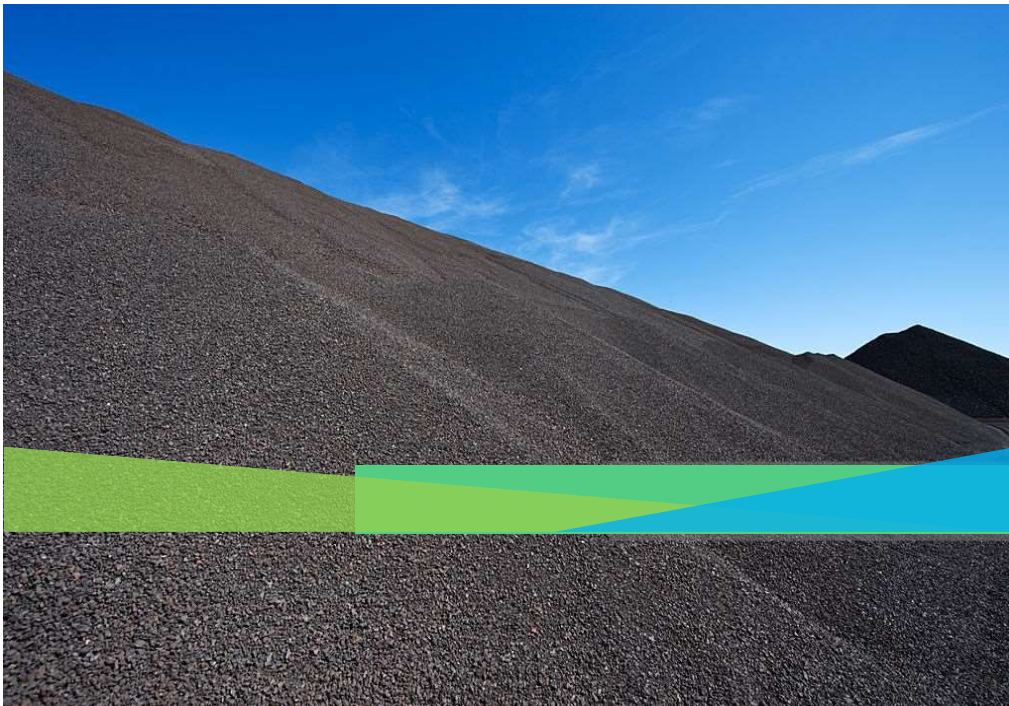

- For 2 decades, Zambia's mining sector has experienced significant foreign interest and investment driven mainly by a low taxation environment and low political interference.
- Zambia has some of the world's highest-grade manganese ore deposits.
- With several expected expansion plans forthcoming, Zambia is viewed as a key growth area for manganese production
- In addition to manganese, Zambia is also likely to rank the country under the top 5 highest copper producers. Also Zambia's coal industry is viewed as a key growth sector. Despite currently being one of the smallest coal producers in Southern Africa, Zambian coal output is forecast to experience rapid growth.

Green Core Enterprises

Overview

We are deeply committed to becoming a leading supplier of specialty metals while practicing good corporate citizenship

- Zambia based mining company
- Green Core Enterprises, founded in 2005 is a leading boutique mining company focused on exploration and development of highly prospective manganese assets in Zambia.

Green Core Enterprises

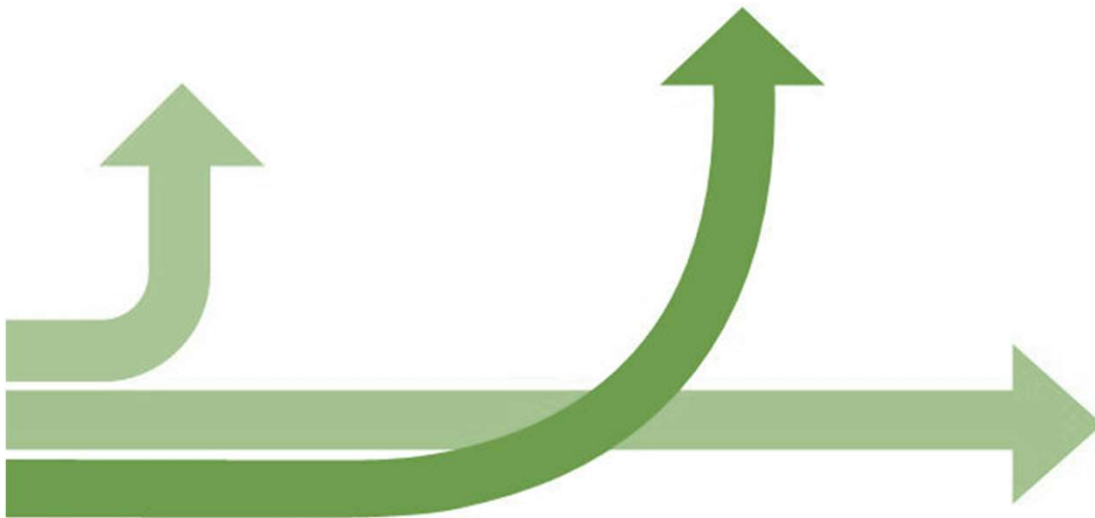

Key Advantages: Green Core offers several key advantages:

Green Core Enterprises

Key Differentiators

- Green Core holds significant interest in all the established manganese mining districts Mansa, Kabwe, Serenje, Kanona and Mpika in Zambia.
- Our Mining arm focuses on production and exports of a high grade, high quality manganese ore from our licenses in Zambia along with our ventures with other small scale mining operators.
- Our mining operations and processes are environmentally sound and our outreach program embraces community involvement as well as high health and safety standards.

Green Core Enterprises

Key Differentiators

- Green Core is at the forefront of mining activity in Zambia
- We are currently engaged in many big projects including the ones from our buyers in South Africa and Middle East.
- We are also engaged in the mining and trade of precious metals and stones for some of our other overseas buyers.
- Green Core has its own mineral trading permit and has full legal authority to export minerals from Zambia.
- We further arrange mineral export permits as per shipment basis and arrange for weigh bridge slips for our clients.
- Our company also has tie ups with credible logistic companies enabling us to move the cargo to Dar e Salam to be further shipped to client locations.
